MOORING AND TOWING MARINE EQUIPMENT

PTW® High Holding Power Anchor

High Holding Power anchors allow a weight reduction of 25% compared to an ordinary anchor. The only one made in Italy by qualified workers. Made of certified high tensile steel plates. Available in fully balanced or non balanced version. 10% shortened shank possible. Type approved by most important classification societies. Available in hot dip galvanized execution, special stainless steel DUPLEX®, electro-polished and super passivated.

Welded PTW® anchors are an excellent solution for both yachts and ships, always in the welded anchors range.

Now our PTW® anchor is available with a base plate allowing the possibility of a retractable mooring area on board for total comfort during navigation. The base plate can be made from different material to the anchor, hot dip galvanized anchor with mirror polished duplex stainless steel base plate, combining the shiny finish of duplex with the strength of a galvanized anchor.
